

# Waterproofing BONDER A-8100

## Product Description

A-8100 Waterproofing Bonder is a proprietary polymer designed to be used as a bonding and waterproofing agent over A-1600/A-1620/A-1625/A-1630 Flex Mesh in Americrete's Metal Lath Waterproofing and Flex Coat system. See Manufacturer's Specification A-9,000 and A-9,100,A-16,000 for complete installation procedures.

## Primary Uses

A-8100 Waterproofing bonder can be used as a primer for cementitious overlays. It must be used with Americrete's Waterproofing Systems when adhering the flex mesh to the A-900 Waterproofing Basecoat.

## Characteristics

Environmentally safe, non-reemulsifiable water borne proprietary co-polymer. Superior adhesive and bonding strength provides waterproofing, flexibility and abrasion resistance.

## Coverage Rate

Americrete A-8100 Waterproofing bonder will achieve 200-250 square feet per gallon over Flex Mesh.

## Application

A-8100 is applied over Flex Mesh with a paint roller or a ¼" nap roller. You must let A-8100 dry completely before continuing.

## Important Notice to Purchaser

Please see Important Notice to Purchaser in the front of this Specification Book.
