

# Waterproofing Basecoat-Gray A-900

## Product Description

Waterproofing Basecoat is a powdered proprietary co-polymer that is mixed with cement and sand to achieve the highest in quality for waterproofing plywood decking. It has larger sand than all of the other Americrete products, and can be used in virtually any climate due to it's ability to resist freeze/thaw cycles. When going over concrete or doing build-ups with this product, add 1 gallon Concrete Bonder A-300 to this product. See specification A-9000.

## Coverage Rate

Waterproofing Basecoat will receive approximately 35-40 square feet per bag, depending upon the application.

## Primary Uses, Characteristics, and Advantages

This product eliminates concrete removal, and is a single component mix by just adding water. Waterproofing Basecoat has superior bonding capabilities, is weather resistant, and flexible. This product is water resistant, chemical resistant, and nonreemulsifiable. Waterproofing Basecoat can be applied on interior and exterior applications. Waterproofing Basecoat is freeze/thaw resistant. This product is environmentally friendly.
