

Americrete^{Inc}
MANUFACTURER OF DECORATIVE OVERLAYS & SEALERS
Concrete Shield
A-1350

Product Description

A-1350 Concrete Shield is a waterborne, non-flammable, concrete top coat sealer designed to replace regulated solvent borne coatings. This product will dry hard and form a durable film which is impervious to moisture or chemicals and is UV resistant. VOC's are less than 50 grams per volatile liter, calculated.

Coverage Rate

A-1350 Concrete Shield will achieve approximately 300-350 square feet per gallon, depending upon the surface applied to and the application procedure followed.

Primary Uses

A-1350 Concrete Shield is a semi-gloss product that has the ease of application of acrylics and the performance of urethanes. Concrete Shield penetrates the surface for a tenacious bond and is stain and abrasion resistant. A-1350 is water repellent, non-yellowing, and is easy to clean and maintain. Concrete Shield is a breathable, durable product with a semi-gloss look. It is water base for easy application and clean up.

Application

A-1350 Concrete Shield is used as a protective, decorative system over new and old, pigmented, and non-pigmented concrete, masonry, and wood surfaces. Concrete Shield can be used on pool decks, natural stone, stamped concrete, stucco, walkways, industrial floors, kitchen floors, concrete block, exposed aggregate, brick, precast concrete, tile, fencing, wood decks, Mexican pavers, and anything that will accept a penetrating sealer **except** porous flagstones.
