MANUFACTURER OF DECORATIVE OVERLAYS & SEALERS

Stamp Crete Primer A-750 (White)

Product Description

Stamp Crete Primer is a powdered proprietary co-polymer mixture that is designed to be the primer for Stamp Crete A-700. Designed as a primer or coating. Can be used in virtually any climate. Stamp Crete Primer can also be used for patching or coating of concrete.

Coverage Rate

Stamp Crete Primer will receive approximately 250 - 300 square feet per bag with a broom application. Coverage will depend upon the porosity of the concrete, and application procedure followed.

Primary Use

This product eliminates concrete removal, and is a single component mix by just adding water. Stamp Crete Primer has superior bonding capabilities, is weather resistant, and is extremely flexible. Stamp Crete Primer must be applied 1/8 inch in thickness. This product is water resistant, chemical resistant, and nonremulsifiable. Stamp Crete Primer can be applied on interior and exterior applications. This product is environmentally friendly. **Note:** Apply Stamp A-700 directly into wet Stamp Crete Primer A-750. Do not let Stamp Crete primer dry before Stamp application, see specification A-7000 for complete installation instructions.

Application

Walkways, patios, amusement parks and casinos, pool decks, bridges, parking structures, driveways, one step tile set, slabs, curb and gutter repair, warehouse floors, waterproof retaining walls, leveling floors, and many more. See Specification A-7,000 for complete installation instructions.
