

Paint Chip Floor System A-PCKIT

Product Description

A-PCKITs are all inclusive, paint chip kits that contain everything needed to install Americrete's Epoxy Paint System for 200 square feet. Also included is a Paint Chip Installation DVD and a mixing wand.

Primary Uses

A-PCKITs are designed to be used to achieve a speckled flake look, similar to terrazzo or granite. Great for garage floors, kitchens, bathrooms, patios, pools, laundry rooms and counter tops. A-PCKIT comes in four different blends to choose from: APCKIT201 - Light Gray, A-PCKIT202 - Dark Gray, A-PCKIT203 - Light Tan, A-PCKIT204 - Dark Tan.

Coverage Rate

The coverage rate is 200 square feet per box.

Application

A-PCKITs are primarily used indoors. See Manufacturer's Specification A-60,000 for complete installation procedures. A-PCKITs are excellent for home owners or contractors that are concerned with waste or theft of products on job. After using Americrete Paint Chip Kits, there are virtually no left over materials. The kits are measured precisely at 200 square feet of coverage per box.

Important Notice to Purchaser
