

Spray Rock A-PS

Product Description

A-PS Spray Rock is a special blend of crushed granite rock that must be mixed with A-5200 Spray Rock Bonder at a ratio of 2 to 1 for the large rock and 1.5 to 1 for the smaller rock. When spraying this mixture, it will create an anti-skid coating to any surface including concrete, walls, barbecues, etc. It can change any surface to a stone-like appearance.

Primary Uses

A-PS Spray Rock is designed to be used as a texture coat for walls and floors or it can be troweled smooth.

Coverage Rate

Spray rock will cover approximately 150 square feet per mix.

Application

Spray Rock comes in many colors and can be applied to walls or floors including, but not limited to, stucco, block, brick, concrete, drywall and plywood. Spray Rock must be sealed. Please consult an Americrete representative for the appropriate sealer.
