

# Wall Stamp Bonder W-8000

## Product Description

W-8000 Wall Stamp Bonder is a proprietary concrete polymer concentrate designed to be used as a primer for Portland cement or for A-8300 Wall Stamp. It achieves unusual and unique **adhesion** and **waterproofing** properties for thin Portland cement overlays.

## Characteristics

Environmentally safe, non-reemulsifiable water-borne proprietary co-polymer. Allows for virtually any type of surface texture. Excellent freeze/thaw resistance, and resists ultraviolet degradation. Superior adhesive, and co-adhesive bonding strength. Provides waterproofing and flexibility to standard Portland Cement admixtures. Provides abrasion resistance.

## Coverage Rate

W-8000 bonder will achieve approximately 250 to 300 square feet per gallon.

## Typical Application

Used as a bonder/primer for A-600 when Vapor Emission exists or if water permeability or if cement coating will be submerged in water. See specification A-20,000. **W-8000** is also used as a bonder for **W-8300 Wall Stamp**.

## Application

See manufacturer specification. For mixing instructions, please refer to the Americrete Mix Ratio Chart.

## Important Notice to Purchaser

Please see Important Notice to Purchaser in the front of this Specification Book.
